

DATA1002 Week 11 Tutorial

Monday 20/10/25

Tutorial Outline

- Overview of today's test
- Python Coding Test

THE UNIVERSITY OF
SYDNEY

Tutor: *Tommy Lu*

Sit at a table with at least 1 seat separating you and your neighbour.

At your table, have **Ed on your laptop** (or a desktop computer) with your **USyd ID or photo ID** next to you. Everything else (including phones) should be placed in your bag and then under your table.

Please **come and see me** if you:

- Do not have any photo ID on you
- Are not enrolled in this particular tutorial session

Exam Conditions

- The test is **closed book**: you cannot access notes, lecture slides, previous labs, or any online resources including AI tools.
- You cannot **use your own IDE** such as PyCharm or VS Code during the test. You must complete all coding questions in the provided Ed environment.
- Additional usual exam conditions apply (i.e. no talking, if you need assistance raise your hand etc.)

Exam Conditions

- You will have **10 minutes of reading time** where you can review the questions but not start coding. After that, there will be **1 hour and 20 minutes** to complete the test.
- If you finish early, raise your hand do show me that you've completed the test.
 - If you complete the test before the final 15 minutes, you can leave the classroom.
 - If you complete the test within the final 15 minutes, you must remain until the end of the test.

Academic Dishonesty

- If you are caught breaking any of the exam conditions, you will firstly be provided a verbal warning.
- If you repeat breaking any of the exam conditions, this will be noted down and then sent to the unit coordinator without informing you. *You will then subsequently risk failing this assessment item.*

General Advice

- For any questions that require to type an answer retrieved from code (rather than code output), use the “Dataset Description” page to run this code. Other code submissions should only be before the relevant question.
- Press “Test” as many times as you can! You will only be graded by the final submission.
- If you get ticks on everything (which will also show hidden test cases), feel confident to move on.
- Don't forget to hit  when you're done!

Any questions?
